

2.4 Map D: South of Kirby Misperton

D1. Habton Road is quiet with good sightlines. The road has just been resurfaced and although it is a fairly wide speed derestricted road, it felt suitable for the route to use, down to very little traffic using it and the omission of a centre line made it feel less intimidating. One additional minor improvement for the route would be to paint cycling symbols on the carriageway surface both to mark the route but more importantly to highlight use of the route by cyclists to car drivers.
